

# Stage Requirements

## Stage Requirements:

A suggested stage size of 16 feet wide by 12 feet deep with an unobstructed 12 foot ceiling height over the stage preferred. An 8-10 foot ceiling height can be accommodated.

A table approximately 3 feet by 3 feet square shall be provided on stage for the artist's props.

If the purchaser wishes to have a podium on stage, it should be removed prior to the artist's performance.

The stage shall be stable and (if possible) interlocked.

Stage steps should be directly accessible to the audience from each side of the stage or from the front.

## Lighting:

Full illumination over the stage, if possible. The audience can be in 1/2 to full illumination.

## Sound Requirements:

The purchaser shall provide a microphone on a stand and access to the sound system for a CD player connection. If available, a wireless lapel microphone may also be used in addition to the microphone on a stand.

If a lapel microphone is provided by the artist, the microphone's receiver needs a 1/4 inch cable connection to the sound system and an electrical outlet near the sound system.

## Suggestions for Success:

For after-dinner shows, the majority of the audience should have completed their meal prior to the beginning of the performance. (It's difficult to enjoy a good meal and a performance at the same time).

Laughter is contagious... so, it's better when the audience is seated closer to both the stage and each other.
